I hope all had a very Happy Easter! Spring is definitely in the air, including the winds. Hopefully we are in for a calmer April.

If you haven't made plans already, please consider joining the rest of us for the annual Awards & Recognition dinner on April 21st. Details are on the website. In May, NMTS will again host a rest stop for the Santa Fe Century. Our perennial leader, Hal Stevens, will be AWOL this year. In his stead, Dianne Cress will be the lead and point-of-contact (treasurer@nmts.org). If you would like to help out, drop her a line.

For the few e-mountain bikers (MTB)in the crowd—I'm one—be advised the BLM has restricted Placitas (perhaps other sites) from e-MTBs. BLM has put the power assisted MTB's in the category as other motorized vehicles. Placing a power assisted MTB in the same category as an enduro motorcycle is like putting a golf cart in the same category as a Corvette. In my opinion, their decision is misplaced. I will raise my objection to BLM and State of NM, but not as President of NMTS. I note, similar restrictions exist outside of the local area.

Excessive speed on a trail is imprudent and unsafe. One of the reasons cited often restricting e-MTBs here and in other areas of the country is speed and safety. So, I will offer my view. E-MTB's certainly climb faster than a trad MTB. But not that much faster. On descent, ALL MTB's descend quickly and, at times, too fast. The chief factors controlling speed are trail features and condition; rider capabilities; and, most importantly traffic on the trail. Traffic on joint use trails includes pedestrians, ses, and other MTB's. Regardless of power assisted or not, use good judgment especially on single-track, multi use trails. I extend my caution to bike paths such as the Bosque. A 20 mph or more pace line is imprudent when there are others on the trail.

Ride Rating System

Mileage: Is total distance for the ride's route. Ride may include options for variations on the route and if so will specify additional distances within the ride description.

Pace: Is the speed a rider is expected to maintain on flat terrain with no wind. Think of it as an indicator of level of effort. Actual speed would be slower on climbs and faster on descents. The Pace is also not equivalent to average speed, because a route usually includes stops (rest stops, stop signs or lights, etc.), which will reduce the average speed.

Terrain: A descriptor of the ride's route terrain. In order from easiest to more difficult: flat; minor hills; moderate hills; frequent, steep hills; and advanced, difficult climbing.

"We are in need of a Vice President and Secretary. I ask your serious consideration"

President's Corner (cont'd from page 1)

We encourage tours both domestic and foreign. However, NMTS does not formally sanction club rides outside the US. Our insurance affords the club officers, riders, and ride leaders a degree of insurance protection. However, it is limited to club sanctioned rides within the US. Apart from the caveat, NMTS will continue to encourage and announce tours beyond the US borders our members organize.

We are in need of a Vice President and Secretary. I again ask your serious consideration. One task before the Board of Directors this year is looking to the future. Actions include marketing our brand to increase club membership, the scope of activities, and future vision. Darcy Lewis (freewheeleditor@nmts.org) is leading the effort.

Ride often, ride safe, ride fun.
-Dave Olson, NMTS President

March One Time Ride Recaps

Date	Name	Summary
3/2	La Reforma –Meander Ride leader John Gillett	<p>This ride was designed around the predicted winds for the day, but the best laid plans...</p> <p>Thirteen riders headed south across the entire length of the NDC into a mild headwind (as planned). We did enjoy predicted west winds while heading east from UNM to Tramway, but the forecast of brisk south winds to push us across Tramway flipped, and we endured headwinds north and west on Tramway. For the final couple of miles heading south, the wind shifted again so we had to finish into the wind. The saving grace of the ride was finishing at La Reforma, with great food and beverages.</p>
3/9	Nexus Ride Ride leader John Gillett	<p>Only a Nexus ride would attract 14 riders on a cold and cloudy day. The route winds around the east heights, including a climbing loop into Four Hills. Our coffee stop was at O’Bean’s on Tramway at San Rafael. Shortly thereafter the sun appeared, providing a warm-ish transit back to Nexus for Cajun-style cuisine and abundant local brews.</p>
3/12	Placitas Mountain Bike Ride leader John Gillett	<p>We had four riders on a sunny, breezy Tuesday afternoon, and we had the entire trail system practically to ourselves. After a 2.5-mile, 500’ climb we were at the top of Bobsled, and were entertained by the very popular 2.5-mile romp to the bottom. From there we enjoyed the ups and downs of the “toilet bowl” canyon, followed by an easy traverse back to the trailhead via Ewok and Down & Out. What a great afternoon outing!</p>
3/23	Ride the Rail Runner Ride Leader- Chris Marsh	<p>Four riders turned out to ride 45 miles down to Belen, have lunch and return via the rail runner.</p>
3/30	Canteen – Gutierrez Ride leader John Gillett	<p>On March 30 a lucky 13 riders showed up for a climb through Tijeras Canyon to the beautiful, low-traffic Gutierrez Canyon transit to Frost Road. The weather was sunny with very little wind for the 1200-foot climb from Albuquerque’s east edge to the Triangle in San Antonito. After a regroup/coffee stop, we reversed course. By this time there was a southwest wind, but it was offset by the gravity-assist of riding downhill 1200 feet. All in all, a short but pleasant climbing ride, followed by appetizing fare at the Canteen Taproom.</p>
